EXPERIENCE

Web Developer Trainee

March 2026 – Present

Walster Technology Pvt Ltd — Pune, Maharashtra

- Working on front-end web development using HTML, CSS, JavaScript, and React.
- Creating responsive, user-friendly, and interactive web interfaces using React and modern front-end technologies.
- Developing and customizing websites using WordPress and Elementor.
- Collaborating with the team to implement UI designs, optimize website performance, and enhance user experience.
- Developing reusable React components to build dynamic user interfaces.
- Debugging, testing, and fixing front-end issues to ensure smooth functionality across different browsers and devices.

SKILLS SUMMARY

- **Languages:** Java, HTML, CSS, JavaScript, SQL
- **Frameworks:** Tailwind CSS, JDBC, Servlet, React, Collection Framework, Hibernate, Spring, Spring Boot

PROJECTS

Hostel Hub

July 2025

- Developed a comprehensive Android application aimed at streamlining hostel management for both students and wardens.
- The app facilitates efficient communication, book room, book meal plan, give feedback and com plaints.
- Integrated authentication and role-based access for students and wardens.
- Enabled students to book hostel rooms and meal plans, submit leave requests, provide feedback, and register complaints through the application.
- Managed hostel data efficiently using a backend database for storing student records and booking details.

Hospital Management System

Mar 2024

- Developed a centralized system to manage hospital operations such as patient registration, doctor scheduling, billing, and medical records.
- Implemented user roles with role-based access: Admin and Patient.
- Developed RESTful APIs to handle CRUD operations for patients, doctors, appointments, and billing details.
- Integrated database management using MySQL to securely store patient and hospital records.
- Performed API testing and debugging to ensure accurate data processing and seamless communication between the frontend and backend.
